Company Overview: Wizard Cyber

Wizard Cyber, a key company within the Wizard Group, specializes in managed cybersecurity services, with a particular focus on the Microsoft Security Stack

Serving enterprises around the world, our state-of-the-art global SOC infrastructure operates 24x7x365, featuring SOC s in the Qatar, UK, Middle East , Philippines, and the USA

Our commitment to security and expertise in the field allows us to provide premium cybersecurity services tailored to your organization's needs

Our Expertise in Action

We are a Microsoft Security Solutions partner and hold all 4 security specializations of Cloud Security, Threat Protection, Identity and Access Management, and Information Protection and Governance

Additionally, as a Microsoft FastTrack partner, we are committed to helping our customers accelerate their digital transformation with comprehensive and secure solutions

Proven Solutions
With a proven record of accomplishment, we de-liver practical, flexible, and cost-effective solutions trusted by enterprise level customers across a multitude of industry sectors

Certified Excellence
All our technical staff are trained through the 'Wizard Cyber Academy' and hold various Microsoft certifications from SC- 200/300/400 & AZ – 500 programs

Commitment to Quality
Our operations are certified to ISO27001 and ISO9001 standards, which speak to our commitment to quality and security management programs

Local Presence
We operate multiple global security operation centers to cater to global markets

Company Overview: Wizard Group

Established in 1995, Wizard Group has become a leading global provider of comprehensive IT and cybersecurity solutions, serving thousands of organizations across dozens of countries

Our extensive range of services include SOC, NOC, cloud, AI & Development, and Microsoft-specialized support, catering to businesses across a diverse array of industries

Over the years, Wizard Group has grown to encompass four distinct companies, each offering unique, specialized services

Working together in a harmonious and cohesive manner, we deliver an unparalleled, all-encompassing experience for enterprises that partner with us

Our Microsoft Partnership

Wizard Group is proud of its longstanding partnership with Microsoft, a relationship that has flourished since 1995

As a Microsoft Solutions Partner with multiple specializations, we have built connections and gained insights that distinguish us from the competition

By leveraging our Microsoft expertise, we help our customers maximize their investment in Microsoft products, offering enhanced functionality and improved capabilities

At Wizard Group, we empower businesses to succeed by providing customized and premium IT solutions

Our extensive experience and robust partnership with Microsoft enable us to deliver exceptional value and support

Partnership with Microsoft: A Commitment to Excellence

Wizard Cyber is proud of its longstanding partnership with Microsoft, a relationship that has flourished since 1995

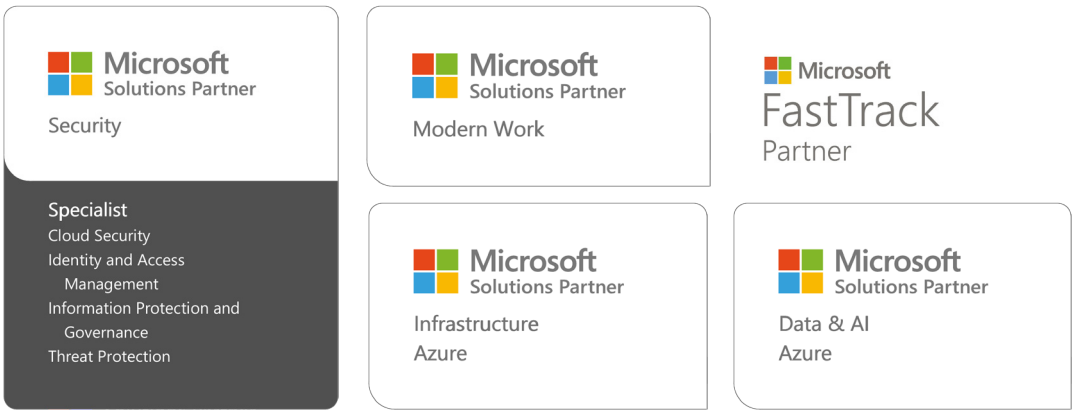
As a recognized Microsoft Security Solutions Partner and Azure Expert Managed Service Provider (MSP) with all 4 security specializations of Cloud Security, Threat Protection, Identity and Access Management, and Information Protection and Governance, we have built connections and gained insights that distinguish us from the competition

Additionally, along with our Security specialization badge, our expertise is further validated by holding Microsoft badges in Modern Work, Infrastructure, and Data & AI, showcasing our comprehensive capabilities across the Microsoft ecosystem

As a FastTrack partner, Wizard Cyber is uniquely positioned to assist organizations in deploying and adopting Microsoft 365 and Azure services; by leveraging our Microsoft expertise, we help our customers maximize their investment in Microsoft products, offering enhanced functionality and improved capabilities

In **our partnership with Microsoft** further strengthens our regional presence, enabling us to offer localized expertise and tailored solutions

By collaborating closely with Microsoft, we ensure our clients benefit from the latest innovations and cybersecurity solutions, specifically designed to address the unique challenges



Managed Security Services Partner

At Wizard Cyber, we leverage Microsoft security solutions to empower organizations with comprehensive and proactive protection

Together, these solutions create a unified and robust security framework, allowing businesses to stay resilient in an ever-evolving digital landscape

Our Services

MXDR

We built MXDR with the vision of creating a complete threat detection and response service that protects every organisation against even the latest cyber threats

Managed SOC

Our managed service is powered by our 24x7x365 global SOC, offering our customers complete, around-the-clock coverage at all times of day, wherever their business or devices are located

Security Copilot

We harness the power of Security Copilot to revolutionize threat detection and response

This AI-driven tool integrates seamlessly with our SOC operations, providing actionable insights and enhancing our ability to protect your business against evolving cyber threats

Purview

We utilize Microsoft Purview to deliver advanced data governance and compliance solutions

By ensuring your sensitive information is protected and regulatory requirements are met, we help you mitigate risks while maintaining business continuity

Entra ID

We nhance your organization's identity and access management

We secure user authentication, control application access, and provide peace of mind with robust protection against identity-based threats

Intune

We leverage Microsoft Intune to manage and secure endpoints across your organization

Our tailored approach ensures your devices and data remain protected, enabling seamless productivity without compromising security

Microsoft Sentinel Managed Technology

Fully scalable to the size of your organization and cloud-native, **Microsoft Sentinel** delivers intelligent security analytics and threat intelligence in a single, cost-effective solution

The adoption of Sentinel technology reflects the nation's commitment to leveraging advanced tools to support its vision of a smart and secure future

Collect Data at a Cloud-scale

Microsoft Sentinel collects data from all users, devices, applications, and infrastructure within your system, whether it's on-premises or in the cloud

Detect Evasive Threats

By utilizing Microsoft's analytics and state premium threat intelligence technology, you can stay one step ahead of new and advanced cyber threats

Investigate Threats with Ease

The power of artificial intelligence combined with Microsoft's extensive cyber security research ensures that investigating threats has never been more efficient and effective

Respond to incidents Rapidly

Built-in automation and orchestration tools allow common tasks to be efficiently managed, as well as improving your ability to respond to incidents quickly

Microsoft Sentinel empowers your investigation and detection processes with advanced artificial intelligence

This provides valuable insights that are based on data collected from a wide variety of data connectors, giving you up-to-date and actionable advice

These connectors include key Microsoft sources as well as support for 3rd party solutions such as AWS, Symantec, Barracuda, and Cisco

Managed Security Operations Centers

Our SOC-as-a-Service was developed with a singular goal: to deliver a comprehensive solution for real-time threat management and robust defense that secures businesses of all sizes against the evolving landscape of cyber threats

Harnessing the power of advanced threat intelligence, SIEM (Security Information and Event Management) technology, and round-the-clock global response capabilities, our service elevates your cyber defense strategy

Enhanced by an array of **Microsoft security solutions** and the expertise of our Microsoft-certified professionals, our SOC-as-a-Service offers unmatched enterprise-grade cybersecurity safeguarding for your business

24x7x365 Global Vigilance

Round-the-clock protection by top-tier experts, securing your business globally

Threat Intelligence

Analyze and respond to threats in real-time by leveraging Microsoft Sentinel

Complete Incident Reponse

Threats addressed swiftly and effectively, from identification to resolution

CYBERSHIELD

Our proprietary SOC Management platform delivers insights and analytics for superior security, integrated with Microsoft Sentinel and Security Copilot

Managed Microsoft Sentinel

Backed by our 24x7x365 global Security Operations Center (SOC), we ensure your business is safeguarded around the clock

CYBERSHIELD
Technology

CYBERSHIELD XDR Service combines our cyber security experts' incident response skills, threat hunting expertise, and cyber security knowledge with Microsoft's most comprehensive XDR — enabling us to prevent, detect, and respond to threats across all identities, endpoints, applications, email, IoT, infrastructure, and cloud platforms

How does CYBERSHIELD XDR Work

CYBERSHIELD XDR is built on the power of AI, big-data analytics, and high-performance computing

Bringing you multi-vector threat detection and a full-service response at remarkable speeds

Microsoft Defender XDR and Zero Trust Security

Building a Zero Trust Security framework using multiple vendors has ZERO chance of success

Implementing a Microsoft Defender XDR for Zero Trust Security must be at the forefront of any modern cyber security strategy for organisations of any size and industry that are running Microsoft Windows or Office 365

Security Copilot Technology

Microsoft Security Copilot revolutionizes security operations by combining AI-driven insights, advanced automation, and seamless collaboration, enabling teams to detect, analyze, and respond to threats more efficiently and effectively

Proactive Threat Detection

Simplified Incident Management

Custom Playbooks

Powered by SCUs

Integration with Microsoft Defender

Incident Summarization

File Analysis

Guided Responses

Device Summarization

Integration with Sentinel

AI-Driven Playbooks

KQL Query Creation

Our deployment methodology ensures a structured and phased implementation of **Microsoft's Security Copilot**, each phase focuses on maximizing Copilot for Security's capabilities and utilizing Compute Units to their full potential
