Wizard Cyber

Overview

A Security Partner You can Trust

Wizard Cyber, a key company within the Wizard Group, specializes in managed cybersecurity services, with a particular focus on the Microsoft Security Stack

Serving enterprises around the world, our state-of-the-art global SOC infrastructure operates 24x7x365, featuring SOC s in the Qatar, UK, Middle East , Philippines, and the USA

Our commitment to security and expertise in the field allows us to provide premium cybersecurity services tailored to your organization's needs

Our Expertise in Action

We are a Microsoft Security Solutions partner and hold all 4 security specializations of Cloud Security, Threat Protection, Identity and Access Management, and Information Protection and Governance

Additionally, as a Microsoft FastTrack partner, we are committed to helping our customers accelerate their digital transformation with comprehensive and secure solutions

Proven Solutions

With a proven record of accomplishment, we de-liver practical, flexible, and cost-effective solutions trusted by enterprise level customers across a multitude of industry sectors

Certified Excellence

All our technical staff are trained through the 'Wizard Cyber Academy' and hold various Microsoft certifications from SC- 200/300/400 & AZ – 500 programs

Commitment to Quality

Our operations are certified to ISO27001 and ISO9001 standards, which speak to our commitment to quality and security management programs

Local Presence

We operate multiple global security operation centers to cater to global markets

Partnership with Microsoft: A Commitment to Excellence

Wizard Cyber is proud of its longstanding partnership with Microsoft, a relationship that has flourished since 1995

As a recognized Microsoft Security Solutions Partner and Azure Expert Managed Service Provider (MSP) with all 4 security specializations of Cloud Security, Threat Protection, Identity and Access Management, and Information Protection and Governance, we have built connections and gained insights that distinguish us from the competition

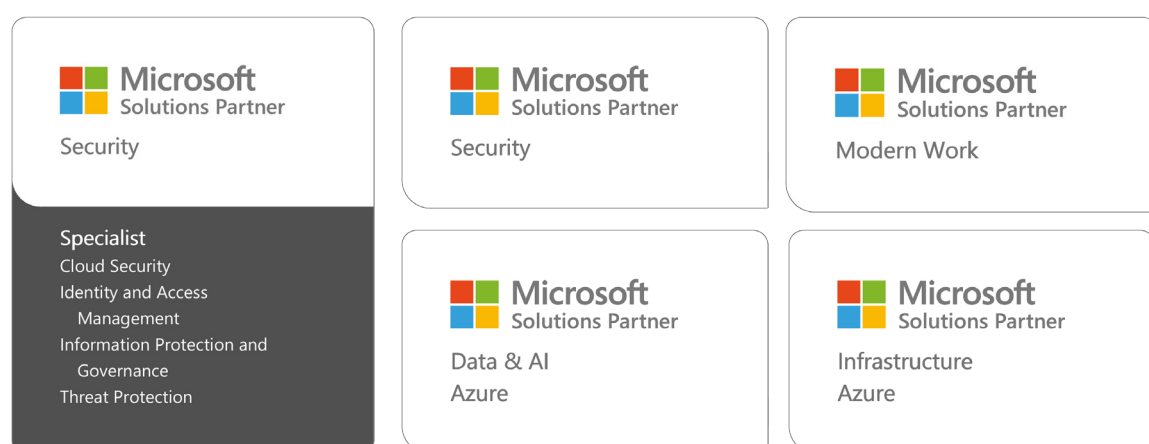

Additionally, along with our Security specialization badge, our expertise is further validated by holding Microsoft badges in Modern Work, Infrastructure, and Data & AI, showcasing our comprehensive capabilities across the Microsoft ecosystem

As a FastTrack partner, Wizard Cyber is uniquely positioned to assist organizations in deploying and adopting Microsoft 365 and Azure services; by leveraging our Microsoft expertise, we help our customers maximize their investment in Microsoft products, offering enhanced functionality and improved capabilities

Wizard Cyber is ECIF ready, ensuring we can support customers and Microsoft in transitioning from various technologies to Microsoft Sentinel through tailored proof-of-concept (POC) implementations

Our expertise ensures a smooth migration process, offering detailed assessments, hands-on guidance, and optimized configurations to align with unique business needs

This partnership ensures that our clients benefit from the most advanced cybersecurity solutions, tailored to meet the complex demands of today's digital challenges

Cytomate

Overview

Cytomate is a premium organization dedicated to revolutionizing cyber security

With a steadfast commitment to innovation, Cytomate specializes in delivering transformative solutions designed to empower businesses and enhance efficiency

Established in Doha, Qatar, Cytomate has rapidly risen as a beacon of innovation in cybersecurity, showcasing its global competitiveness and its distinctive Qatari identity

Our commitment to security and expertise in the field allows us to provide premium cybersecurity services tailored to your organization's needs

Our Expertise in Action

Offensive Security

Advanced penetration testing and red teaming to assess and reinforce security measures

Incident Response

Swift containment and mitigation of cyber incidents, minimizing impact and downtime

Cybersecurity Advisory

Tailored guidance for SMEs and enterprises to align security strategies with evolving threats and compliance requirements

Our products feature a sophisticated plug-in based architecture, allowing for unparalleled flexibility and customization

This architecture enables seamless integration with any existing solutions within just one week, ensuring minimal disruption and maximum compatibility with your current systems

Each plug-in is designed to enhance the functionality of our core products, allowing for tailored solutions that meet the specific security needs of our clients

Additionally, Cytomate is at the forefront of cloud ecosystem adoption, providing robust security solutions for the industry's leading cloud providers

Our commitment to excellence ensures that our clients receive cutting-edge protection and integration flexibility, tailored to their unique security needs

With Cytomate, organizations can confidently secure their digital assets, knowing they have a partner that combines innovative technology with rapid, efficient deployment

Wizard Cyber & Cytomate: Unified Cybersecurity Solutions

Wizard Cyber and **Cytomate** have joined forces to deliver an unparalleled cybersecurity comprehensive solution suite

Combining Wizard Cyber's advanced managed security services with Cytomate's automation and response technology, this partnership empowers businesses with seamless, proactive, and resilient cybersecurity strategies

We provide all the expertise, manpower, and infrastructure you need, drastically reducing your cyber security overheads and removing the need to maintain an expensive in-house SOC team

Our Unified Vision

Protect organizations from emerging cyber threats

Enhance security operations through automation and efficiency

Provide end-to-end cybersecurity support, from monitoring to rapid incident response

Key Strengths of Wizard Cyber

Wizard Cyber specializes in proactive cybersecurity services designed to detect, prevent, and mitigate cyber threats in real-time

Managed eXtended Detection and Response (MXDR)

Advanced threat detection using AI and human expertise

Security Operations Center (SOC) Services

24x7x365 monitoring and incident response by certified analysts

Risk and Compliance Management

Tailored solutions to meet compliance standards such as ISO 27001, GDPR, and PCI DSS

Cyber Threat Intelligence

Continuous threat intelligence updates to stay ahead of cybercriminals

CYBERSHIELD

SOC management platform designed to improve Microsoft Sentinel's functionality

Key Strengths of Cytomate

Cytomate brings innovation to cybersecurity with automation-focused solutions that enhance operational efficiency and incident response

Automated Incident Response (AIR)

Rapid containment and remediation of threats

SOAR (Security Orchestration, Automation, and Response)

24x7x365 monitoring and incident response by certified analysts

Threat Investigation Automation

Minimizing manual efforts in triaging and analyzing threats

Customizable Playbooks

Tailored automation processes to fit unique organizational needs

Complimentary Benefits: Wizard Cyber & Cytomate

The synergy between **Wizard Cyber** and **Cytomate** ensures clients receive the best of both worlds: expert-led security management and premium automation

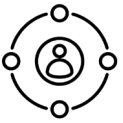

Enhanced Threat Detection and Response

Wizard Cyber's SOC detects threats in real-time, while Cytomate automates response workflows for rapid containment and reinforce security measures

Increased Efficiency

Wizard Cyber's SOC detects threats in real-time, while Cytomate automates response workflows for rapid containment and reinforce security measures

Seamless Integration

Both solutions integrate effortlessly with existing IT environments, ensuring minimal disruption while maximizing security

Scalability and Flexibility

Wizard Cyber provides scalable managed services, and Cytomate's modular automation tools adapt to organizations' unique requirements

What Our Collaboration Brings

Comprehensive Coverage

End-to-end cybersecurity services under one umbrella

Reduced Risk Exposure

Advanced detection and swift remediation

Tailored Strategies

Both solutions integrate effortlessly with existing IT environments, ensuring minimal disruption while maximizing security

24x7x365 Protection

Around-the-clock support and monitoring

Integrating Services for Comprehensive Cybersecurity

Wizard Cyber and **Cytomate** bring together complimentary expertise in cybersecurity, creating a robust partnership designed to protect organizations from a constantly evolving threat landscape

Together, their services form an end-to-end cybersecurity ecosystem that delivers unmatched resilience and protection

Combining Expertise for Maximum Impact

By integrating Wizard Cyber's managed security operations with Cytomate's advanced simulation and deception capabilities, organizations gain a unified approach to cybersecurity

Proactive Threat Management

Continuous monitoring by Wizard Cyber's SOC is enhanced by Cytomate's Breach and Attack Simulation, enabling the identification and remediation of vulnerabilities before they are exploited

Deceptive Defense Mechanisms

Cytomate's cyber deception tools complement Wizard Cyber's detection capabilities by confusing attackers and gathering critical intelligence for rapid response

Holistic Risk Reduction

Combining the strengths of both companies enables comprehensive attack surface management, vulnerability analysis, and compliance assurance

The Unified Advantage

Together, Wizard Cyber and Cytomate provide organizations with a fully integrated, multi-layered cybersecurity framework

This partnership ensures organizations are not only prepared for today's threats but are also equipped to anticipate and defend against future challenges, achieving robust security and business continuity

Phases of Service Delivery

Wizard Cyber and **Cytomate** follow a streamlined, phased approach to deliver integrated cybersecurity services, ensuring thorough protection and adaptability to evolving threats

- 1 Assessment and Planning**
 - **Goal:** Understand the customer's environment and security needs
 - **Key Actions**
 - Wizard Cyber conducts a cybersecurity assessment
 - Cytomate performs attack surface analysis
 - A joint action plan is developed
- 2 Deployment and Configuration**
 - **Goal:** Validate security effectiveness
 - **Key Actions**
 - Wizard Cyber performs penetration testing
 - Cytomate runs BAS scenarios to refine defenses
 - Joint reviews optimize detection and response
- 3 Monitoring and Response**
 - **Goal:** Ensure continuous protection and swift incident response
 - **Key Actions**
 - Wizard Cyber monitors threats via SOC
 - Cytomate enhances defenses with deception tools
 - Joint incident response mitigates risks rapidly
- 4 Continuous Improvement**
 - **Goal:** Adapt to new threats and maintain compliance
 - **Key Actions**
 - Regular updates from Wizard Cyber
 - Evolving simulations from Cytomate
 - Quarterly reviews ensure alignment
