Wizard Cyber
Overview

Managed Cybersecurity Services Partner

Wizard Cyber, a key company within the Wizard Group, specializes in managed cybersecurity services, with a particular focus on the Microsoft Security Stack

Serving enterprises around the world, our state-of-the-art global SOC infrastructure operates 24x7x365, featuring SOCs in the Qatar, UK, Middle East , Philippines, and the USA

Our commitment to security and expertise in the field allows us to provide premium cybersecurity services tailored to your organization's needs

Our Expertise in Action:

Microsoft Security Specialist:

We are a Microsoft Security Solutions partner and hold all 4 security specializations of Cloud Security, Threat Protection, Identity and Access Management, and Information Protection and Governance

Additionally, as a Microsoft FastTrack partner, we are committed to helping our customers accelerate their digital transformation with comprehensive and secure solutions

Proven Solutions
With a proven record of accomplishment, we deliver practical, flexible, and cost-effective solutions trusted by enter¬prise-level customers across a multitude of industry sectors

Commitment to Quality
Our operations are certified to ISO27001 and ISO9001 standards, which speak to our commitment to quality and security management programs

Certified Excellence
All our technical staff are trained through the 'Wizard Cyber Academy' and hold various Microsoft certifications from SC- 200/300/400 & AZ – 500 programs

Local Presence
We operate multiple global security operation centers, including a dedicated SOC in Qatar to specifically cater to its expanding market

Overview of EBLA

EBLA Computer Consultancy Company was established in 1993 with offices in Kuwait, Qatar, UAE (Abu Dhabi & Dubai)

We are one of the largest professionally managed IT companies in the Middle East and a leading systems integrator company in the Arab Gulf region today, focusing on selling and supporting a full range of Enterprise software solutions from two of the leading software vendors in the world - IBM and Microsoft

EBLA's references in Kuwait and Qatar include many distinguished and strategic customers in the Government and the public sectors as well as a number of major organizations in the Oil and Gas sector

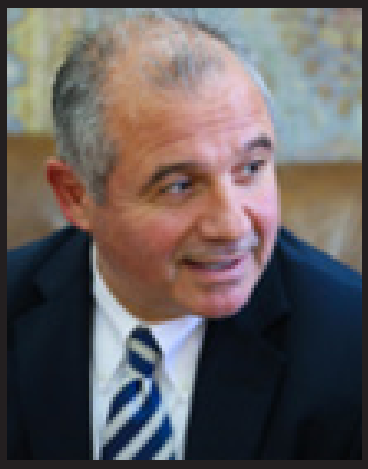
EBLA has over 70% share of the Enterprise Content Management (ECM) market in Kuwait and Qatar

EBLA's Vision

Our vision is to become the market leader in our chosen businesses throughout the Middle East region, yielding maximum return on investment for our partners and shareholders and adding value for our customers' businesses

EBLA's Mission

Provide unmatched turnkey and integrated Business solutions targeted for the enterprise and a range of Professional and Consulting services to our customers



Word From The Founder

We are a leading IT solutions vendor in the Middle East focused on delivering a range of business solutions to our customers in the region
EBLA supports a full range of Enterprise software solutions from two of the leading software vendors in the world – IBM and Microsoft

Our portfolio includes other value-based solutions that are supported by world-leading technology vendors like Computer Associates, Adobe, Citrix and McLaren

I see our strength coming from two main sources: a) our focus on top class internationally reputed enterprise business solutions as the cornerstone of our customers' business success, and b) our commitment to customer care, and the sustained and meaningful relationships that we seek to develop with our customers

Our employees remain our most valuable resource

Hilal Arnaoot
Founder & CEO

Our Partnership with EBLA

The collaboration between Wizard Cyber and EBLA Corporation represents a powerful fusion of cybersecurity and IT solutions expertise

This partnership is built on shared principles, a commitment to innovation, and the pursuit of excellence in delivering tailored services to our clients

Innovative Cybersecurity Solutions

Together, we offer premium cybersecurity technologies that are customized to meet specific client needs and budgets, ensuring optimal protection against evolving threats

Microsoft Expertise

Leverage Wizard Cyber's deep expertise in Microsoft technologies to enhance your organization's functionality and unlock the full potential of Microsoft products

Global Reach and Support

This partnership expands our global footprint, enabling us to deliver top-tier solutions and support across various regions, ensuring consistent service and security no matter where your business operates

Comprehensive IT Management

Our combined strengths provide a holistic approach to IT management, offering robust security measures and seamless system integration to safeguard your business operations and data

Local Market Expertise

International Premium Cybersecurity services, protecting Qatar based clients

Together, Wizard Cyber and EBLA Corporation are committed to advancing technology and cybersecurity. Our partnership is not just a collaboration; it's a promise to deliver comprehensive service, innovation, and reliability, all tailored to meet the unique needs of each client

Partnership with Microsoft: A Commitment to Excellence

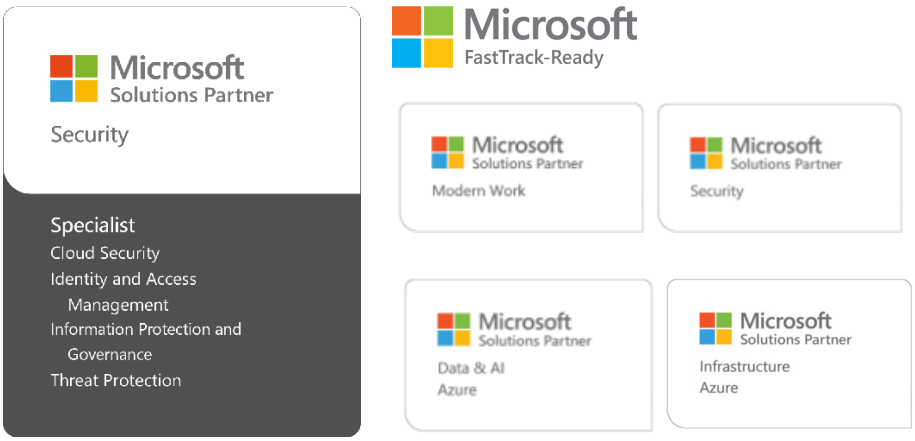
Wizard Cyber is proud of its longstanding partnership with Microsoft, a relationship that has flourished since 1995

As a recognized Microsoft Security Solutions Partner and Azure Expert Managed Service Provider (MSP) with all 4 security specializations of Cloud Security, Threat Protection, Identity and Access Management, and Information Protection and Governance, we have built connections and gained insights that distinguish us from the competition

Additionally, along with our Sercurity specialization badge, our expertise is further validated by holding Microsoft badges in Modern Work, Infrastructure, and Data & AI, showcasing our comprehensive capabilities across the Microsoft ecosystem

As a FastTrack partner, Wizard Cyber is uniquely positioned to assist organizations in deploying and adopting Microsoft 365 and Azure services; by leveraging our Microsoft expertise, we help our customers maximize their investment in Microsoft products, offering enhanced functionality and improved capabilities

This partnership ensures that our clients benefit from the most advanced cybersecurity solutions, tailored to meet the complex demands of today's digital challenges



Wizard Cyber Security Operations Centers

Qatar SOC

Our SOC in Qatar operates 24x7x365, serving as the nerve center for real-time threat detection and incident response

This state-of-the-art facility is staffed by a dedicated team of cybersecurity professionals who utilize advanced threat intelligence and premium technology to monitor, analyze, and neutralize cyber threats around the clock

The Qatar SOC is pivotal in ensuring the security of our clients across various sectors, providing continuous, proactive defense against evolving cyber risks

Global SOC Network

In addition to our flagship Qatar SOC, Wizard Cyber operates a network of strategically located SOCs, each contributing to our global cybersecurity capabilities:

Jordan

Delivers regional insights and specialized security services, enhancing our Middle Eastern cybersecurity infrastructure

Philippines

Ensures continuous monitoring and rapid response, leveraging the expertise of a highly skilled technical team

UK

Bolsters our European operations with comprehensive security management, threat detection, and response strate-

US

Anchors our American operations, providing comprehensive cybersecurity solutions with a focus on critical infrastructure protection and enterprise security

These global SOCs enable seamless collaboration and coordination, which enhances our ability to provide a unified, resilient defense against cyber threats worldwide

Through this extensive network, Wizard Cyber ensures that no matter where your business operates, it is protected by top-tier cybersecurity services

Services

Managed Security Operations Centers

Maximize Your Security Posture with SOC as a Service

A holistic approach to threat management and defense

Our SOC-as-a-Service was developed with a singular goal: to deliver a comprehensive solution for real-time threat management and robust defense that secures businesses of all sizes against the evolving landscape of cyber threats

Harnessing the power of advanced threat intelligence, SIEM (Security Information and Event Management) technology, and round-the-clock global response capabilities, our service elevates your cyber defense
strategy

Enhanced by an array of Microsoft security solutions and the expertise of our Microsoft-certified professionals, our SOC-as-a-Service offers unmatched enterprise-grade cybersecurity safeguarding for your

24x7x365 Global Vigilance
Round-the-clock protection by top-tier experts, securing your business globally

Proactive Threat Hunting
Rapid threat detection and analysis for pre-emptive security measures

Complete Incident Response
From detection to resolution, we handle threats fast, backed by strict SLAs

Threat Intelligence

CYBERSHIELD
Our proprietary SOC Management platform delivers insights and analytics for superior security

WIZARDcyber

Services

Managed eXtended Detection and Response

A complete Solution for Threat Detection and Response

We built MXDR with the vision of creating a complete threat detection and response service that protects every organization against even the latest cyber threats

MXDR integrates Microsoft Sentinel and SIEM capabilities with our ability to detect and respond to threats globally, 24x7x365

Combined with a variety of other leading Microsoft security tools and consultancy from a team of Microsoft-certified experts, MXDR provides your organization with enterprise-level cybersecurity protection

High-fidelity, Real-time Data

Our MXDR service provides your cybersecurity team with access to real-time, high-fidelity data, ensuring that you have a complete view of your organization's security status

Rapid Deployment

We have created a highly streamlined onboarding process , enabling us to implement and deploy MXDR to your organization rapidly with no disruption to your employees or operations

Microsoft-Certified Experts

Every member of our team is stringently Microsoft-certified and regularly tested, our SOC team have decades of experience as cyber security analysts and threat researchers

Microsoft-Certified Experts

Every member of our team is stringently Microsoft-certified and regularly tested. Our SOC team have decades of experience as cyber security analysts and threat researchers

Technology

Microsoft Sentinel

Microsoft's Leading SIEM & SOAR Services at the heart of XDR providing a holistic approach to protecting your organization

With any cyber-attack, the time between breach and detection is critical

Identify suspicious behavior and stop threats in their tracks, wherever they appear in your network our managed Microsoft Sentinel service provides industry-leading protection against all forms of internal and external cyber threats, including data breaches, ransomware, malicious employees, and much more

As a certified Microsoft Solutions Partner and Microsoft Azure Sentinel Expert MSP, Wizard Cyber is the ideal Microsoft Sentinel partner. Our team of cybersecurity engineers are experts in threat hunting, threat detection, incident response, and threat intelligence supported by our 24x7x365, global security operations center (SOC), we ensure that your business is protected every minute of every day

1500+ Security & Compliance Use Cases

Our managed Microsoft Sentinel service utilizes the power of over 1500 security and compliance use cases, increasing threat detection and response capabilities

User Training on Sentinel Features

Training your team on using dashboards and other Sentinel features effectively before they cause harm

Customized Solutions

Reviewing and addressing your organization-specific requirements

Proactive Threat Management

We help you see and stop threats before they cause harm

Technology

Microsoft Defender

Microsoft Defender for Endpoint

Large enterprises rely on a complex web of endpoints, often across multiple geographic locations and constituting a variety of different devices

This can easily lead to many vulnerabilities being present due to the difficulty in monitoring and managing so many endpoints, making them a popular target for cybercriminals

Microsoft Defender for Endpoint secures an organization's endpoints, regardless of how complex and numerous they are

By utilizing industry-leading technology, such as behavioral sensors, cloud security analytics, and threat intelligence, Defender for Endpoint allows you to detect and respond to cyber threats targeting your endpoints accurately and swiftly

Microsoft Defender for Office 365

The rise of remote working has made businesses even more reliant on Office 365, making them a popular target for cybercriminals looking to extract a ransom or cause operational damage

Microsoft Defender for Office 365 secures an organization's environment, protecting against advanced and emerging threats, phishing attacks, business email compromises, and much more

Critically, it also provides protection for enterprises that rely on remote and hybrid workers, regardless of the device their using or where they are located

It achieves this by utilizing industry-leading AI and automation technology to improve threat detection efficiency and provide unlimited scalability

Microsoft Defender for IoT and OT

Cybercriminals know that poorly protected operational technology is easy to breach, allowing them to extract ransoms, harvest sensitive data, and disrupt systems that consumers and businesses rely upon

Microsoft Defender for IoT and OT ensures that your organization's critical infrastructure is protected against the threats of evolving ransomware and malware, as well as well-funded and organized state-sponsored attackers that seek to bring down public utilities and services

It also provides invaluable network detection and response capabilities and integrates seamlessly with Microsoft Sentinel and the wider Microsoft Security Stack
